

CONFERENCE ANNOUNCEMENT

The 9th International Conference on Energy Storage and Intelligent Vehicles

(ICEIV 2026)

Theme: Boosting Decarbonization via Innovation in Energy Storage and Intelligent Transportation

On behalf of the Organizing Committee, we are pleased to announce that the 9th International Conference on Energy Storage and Intelligent Vehicles (ICEIV 2026) will be held in **Macao SAR, China, 28-31 July 2026.**

Energy storage plays a vital role in achieving carbon neutrality. Innovations in energy storage technologies and their applications are essential to accelerate large-scale renewable energy deployment. Decarbonizing the transport sector is another critical pathway toward global climate goals and the sustainable evolution of society. ICEIV is an internationally influential academic conference that provides an excellent forum for scientists, researchers, engineers, and government officials to present and exchange the latest research findings and practical innovations.

Conference Topics (include but are not limited to)

- Electrochemical Energy Storage Technologies
- New Vehicles and Green Transportation
- Energy Storage and Integrated Energy Systems
- AI for Energy
- Energy storage in power distribution systems

We warmly welcome researchers, academics, industry engineers, and government representatives to submit papers and participate in ICEIV 2026. We look forward to gathering in July 2026 in Macao SAR, China.

Yours sincerely,

Organizing Committee of ICEIV 2026
